A poster(wrapper for Discord bot lists

## DOCUMENTATION CONTENTS

### 1.1 API Reference

The following section outlines the API of dbots.

#### 1.1.1 Version Related Info

There are two main ways to query version information about the library.

##### dbots.version\_info

A named tuple that is similar to `sys.version_info`.

Just like `sys.version_info` the valid values for `releaselevel` are ‘alpha’, ‘beta’, ‘candidate’ and ‘final’.

##### dbots.\_\_version\_\_

A string representation of the version. e.g. ‘1.0.0rc1’. This is based off of [PEP 440](#).

#### 1.1.2 Classes

##### class dbots.Poster(client\_id, server\_count, user\_count, voice\_connections, on\_custom\_post=None, \*\*options)

A class that posts server count to listing sites.

###### Parameters

- **client\_id** (`str`) – The client ID used for posting to a service.
- **server\_count** (function or *coroutine*) – The function to use when retrieving the amount of servers.
- **user\_count** (function or *coroutine*) – The function to use when retrieving the amount of users.
- **voice\_connections** (function or *coroutine*) – The function to use when retrieving the amount of voice connections.
- **on\_custom\_post** (Optional[function or *coroutine*]) – The function to use when posting to a *custom* service. This function will be used with the named parameters being `server_count`, `user_count` and `voice_connections`.
- **loop** (Optional[`asyncio.AbstractEventLoop`]) – The `asyncio.AbstractEventLoop` to use for asynchronous operations. Defaults to `None`, in which case the default event loop is used via `asyncio.get_event_loop()`.
- **sharding** (Optional[`bool`]) – Whether or not to use sharding values.

- **shard\_count** (Optional[int]) – The amount of shards the client has.
- **shard\_id** (Optional[int]) – The shard ID the poster is posting for.
- **proxy** (Optional[str]) – Proxy URL.
- **proxy\_auth** (Optional[aiohttp.BasicAuth]) – An object that represents proxy HTTP Basic Authorization.
- **api\_keys** (Optional[dict]) – A dictionary of API keys with the key being service keys and values being tokens.

**property client\_id: str**

The client ID of the poster.

**get\_key(service: str) → str**

Gets an API key.

**Parameters** **service** (str) – The service key to get.

**kill\_loop()**

Cancels the current posting loop.

**async manual\_post(server\_count, service=None, user\_count=None, voice\_connections=None) → dbots.http.HTTPResponse**

Manually posts a server count to a service.

**Parameters**

- **server\_count** (int) – The server count to post to the service.
- **service** (Optional[str]) – The service to post to. Can be *None* to post to all services or *custom* to use the custom post method.
- **user\_count** (Optional[int]) – The user count to post to the service.
- **voice\_connections** (Optional[int]) – The voice connection count to post to the service.

**async post(service=None) → dbots.http.HTTPResponse**

Posts the current clients server count to a service.

**Parameters** **service** (Optional[str]) – The service to post to. Can be *None* to post to all services or *custom* to use the custom post method.

**remove\_key(service: str) → str**

Removes an API key.

**Parameters** **service** (str) – The service key to remove.

**set\_key(service: str, key: str) → str**

Sets an API key.

**Parameters**

- **service** (str) – The service key to set.
- **key** (str) – The API key to use.

**property shard\_count: int**

The shard count of the poster.

**property shard\_id: int**

The shard ID of the poster.

**start\_loop(interval=1800) → dbots.poster.AsyncLoop**

Creates a loop that posts to all services every *n* seconds.

---

**Parameters** `interval` (Optional[int]) – The amount of time (in seconds) to post to all services again.

**class** `dbots.Service(token=None, **options)`

Represents any postable service.

#### Parameters

- `token` (Optional[str]) – The token that the class will use to authorize requests.
- `proxy` (Optional[str]) – Proxy URL.
- `proxy_auth` (Optional[aiohttp.BasicAuth]) – An object that represents proxy HTTP Basic Authorization.

#### `BASE_URL`

The base URL that the service uses for API requests.

**Type** Optional[str]

#### `token`

The token that will be used for the service.

**Type** str

#### `http`

The HTTP client the service is using.

**Type** `HTTPClient`

#### `static get(key: str)`

Gets a service from a key.

**Parameters** `key (str)` – The name of the service to get.

#### `property has_token: bool`

Whether or not the service class has a token.

**class** `dbots.AsyncLoop(timeout, callback)`

### 1.1.3 HTTP Classes

**class** `dbots.HTTPClient(base_url=None, proxy=None, proxy_auth=None)`

Represents an HTTP client that can send requests.

**class** `dbots.HTTPResponse(response, text)`

A wrapped response from an `HTTPClient`:

#### `body`

The body of the response. The response is auto-parsed to json if available.

**Type** dict or str

#### `text`

The text body of the response.

**Type** str

#### `raw`

The raw response from aiohttp.

**Type** aiohttp.ClientResponse

**status**

The HTTP status code of the response.

**Type** `int`

**method**

The method the request used.

**Type** `str`

**url**

The URL of the response.

**Type** `str`

## 1.1.4 Services

**class** `dbots.BladeList(token=None, **options)`

Represents the BladeList service.

**See also:**

- BladeList Website
- BladeList API Documentation

**get\_bot**(`bot_id: str`) → `dbots.http.HTTPResponse`

This function is a `coroutine` returning a `HTTPResponse`.

Gets a bot listed on this service.

**Parameters** `bot_id (str)` – The bot's ID.

**class** `dbots.Blist(token=None, **options)`

Represents the Blist service.

**See also:**

- Blist Website
- Blist API Documentation

**get\_bot**(`bot_id: str`) → `dbots.http.HTTPResponse`

This function is a `coroutine` returning a `HTTPResponse`.

Gets the bot listed on this service.

**Parameters** `bot_id (str)` – The bot's ID.

**get\_bot\_reviews**(`bot_id: str`) → `dbots.http.HTTPResponse`

This function is a `coroutine` returning a `HTTPResponse`.

Gets the bot's reviews on this service.

**Parameters** `bot_id (str)` – The bot's ID.

**get\_bot\_votes**(`bot_id: str`) → `dbots.http.HTTPResponse`

This function is a `coroutine` returning a `HTTPResponse`.

Gets the list of people who voted this bot on this service.

**Parameters** `bot_id (str)` – The bot's ID.

**get\_server**(*server\_id*: str) → dbots.http.HTTPResponse

This function is a *coroutine* returning a HTTPResponse.

Gets the server listed on this service.

**Parameters** **server\_id** (str) – The server’s ID.

**get\_user**(*user\_id*: str) → dbots.http.HTTPResponse

This function is a *coroutine* returning a HTTPResponse.

Gets the user listed on this service.

**Parameters** **user\_id** (str) – The user’s ID.

**get\_user\_bots**(*user\_id*: str) → dbots.http.HTTPResponse

This function is a *coroutine* returning a HTTPResponse.

Gets the user’s bots listed on this service.

**Parameters** **user\_id** (str) – The user’s ID.

**get\_user\_servers**(*user\_id*: str) → dbots.http.HTTPResponse

This function is a *coroutine* returning a HTTPResponse.

Gets the user’s servers listed on this service.

**Parameters** **user\_id** (str) – The user’s ID.

**get\_widget\_url**(*bot\_id*: str, *widget\_type*: str = 'normal', \*\*query) → str

Gets the widget URL for this bot.

#### Parameters

- **bot\_id** (str) – The bot’s ID.
- **widget\_type** (Optional[str]) – The type of widget to show.
- **\*\*query** – The query string to append to the URL.

**class dbots.BotsOnDiscord(token=None, \*\*options)**

Represents the Bots On Discord service.

#### See also:

- [Bots On Discord Website](#)
- [Bots On Discord API Documentation](#)

**check\_review**(*bot\_id*: str, *user\_id*: str) → dbots.http.HTTPResponse

This function is a *coroutine* returning a HTTPResponse.

Checks whether or not a user has reviewed a bot.

#### Parameters

- **bot\_id** (str) – The bot’s ID.
- **user\_id** (str) – The user’s ID.

**get\_widget\_url**(*bot\_id*: str, \*\*query) → str

Gets the widget URL for this bot.

#### Parameters

- **bot\_id** (str) – The bot’s ID.
- **\*\*query** – The query string to append to the URL.

**class dbots.Carbon(token=None, \*\*options)**

Represents the Carbonitex service.

**See also:**

- Carbonitex Website

**get\_bots() → dbots.http.HTTPResponse**This function is a *coroutine* returning a HTTPResponse.

Gets a list of bots on this service.

**class dbots.DBots(token=None, \*\*options)**

Represents the DBots service.

**See also:**

- DBots Website
- DBots API Documentation

**get\_audit(bot\_id: str) → dbots.http.HTTPResponse**This function is a *coroutine* returning a HTTPResponse.

Gets the bot's audit logs.

**Parameters** **bot\_id** (str) – The bot's ID.**regen\_token(bot\_id: str) → dbots.http.HTTPResponse**This function is a *coroutine* returning a HTTPResponse.

Regenerates the bot API token.

**Parameters** **bot\_id** (str) – The bot's ID.**class dbots.DiscordBoats(token=None, \*\*options)**

Represents the Discord Boats service.

**See also:**

- Discord Boats Website
- Discord Boats API Documentation

**get\_bot(bot\_id: str) → dbots.http.HTTPResponse**This function is a *coroutine* returning a HTTPResponse.

Gets the bot listed on this service.

**Parameters** **bot\_id** (str) – The bot's ID.**get\_user(user\_id: str) → dbots.http.HTTPResponse**This function is a *coroutine* returning a HTTPResponse.

Gets the user listed on this service.

**Parameters** **user\_id** (str) – The user's ID.**get\_widget\_url(bot\_id: str, \*\*query) → str**

Gets the widget URL for this bot.

**Parameters**

- **bot\_id** (str) – The bot's ID.

- **\*\*query** – The query string to append to the URL.

**user\_voted**(*bot\_id*: str, *user\_id*: str) → dbots.http.HTTPResponse  
This function is a *coroutine* returning a HTTPResponse.

Checks whether or not a user has reviewed a bot.

#### Parameters

- **bot\_id** (str) – The bot's ID.
- **user\_id** (str) – The user's ID.

**class** dbots.DiscordBotList(*token=None*, \*\*options)  
Represents the Discord Bot List service.

**See also:**

- [Discord Bot List Website](#)
- [Discord Bot List API Documentation](#)

**class** dbots.DiscordBotlistEU(*token=None*, \*\*options)  
Represents the DiscordBotlistEU service.

**See also:**

- [DiscordBotlistEU Website](#)
- [DiscordBotlistEU API Documentation](#)

**get\_analytics**() → dbots.http.HTTPResponse  
This function is a *coroutine* returning a HTTPResponse.

Gets this bot's analytics.

**get\_bot**() → dbots.http.HTTPResponse  
This function is a *coroutine* returning a HTTPResponse.

Gets this bot's data.

**get\_votes**() → dbots.http.HTTPResponse  
This function is a *coroutine* returning a HTTPResponse.

Gets this bot's votes.

**class** dbots.DiscordBotsGG(*token=None*, \*\*options)  
Represents the Discord Bots service.

**See also:**

- [Discord Bots Website](#)
- [Discord Bots API Documentation](#)

**get\_bot**(*bot\_id*: str, \*\*query) → dbots.http.HTTPResponse  
This function is a *coroutine* returning a HTTPResponse.

Gets the bot listed on this service.

#### Parameters

- **bot\_id** (str) – The bot's ID.
- **\*\*query** – The query string to append to the URL.

**get\_bots**(*\*\*query*) → *dbots.http.HTTPResponse*  
This function is a *coroutine* returning a *HTTPResponse*.

Gets a list of bots on this service.

**Parameters** **\*\*query** – The query string to append to the URL.

**class dbots.DiscordExtremeList**(*token=None*, *\*\*options*)

Represents the Discord Extreme List service.

**See also:**

- [Discord Extreme List Website](#)
- [Discord Extreme List API Documentation](#)

**get\_bot**(*bot\_id: str*) → *dbots.http.HTTPResponse*  
This function is a *coroutine* returning a *HTTPResponse*.

Gets the bot listed on this service.

**Parameters** **bot\_id** (*str*) – The bot's ID.

**get\_statistics**() → *dbots.http.HTTPResponse*  
This function is a *coroutine* returning a *HTTPResponse*.

Gets the statistics of this service.

**get\_user**(*user\_id: str*) → *dbots.http.HTTPResponse*  
This function is a *coroutine* returning a *HTTPResponse*.

Gets the user listed on this service.

**Parameters** **user\_id** (*str*) – The user's ID.

**class dbots.DiscordLabs**(*token=None*, *\*\*options*)

Represents the Discord Labs service.

**See also:**

- [Discord Labs Website](#)
- [Discord Labs API Documentation](#)

**get\_bot**(*bot\_id: str*) → *dbots.http.HTTPResponse*  
This function is a *coroutine* returning a *HTTPResponse*.

Gets the bot listed on this service.

**Parameters** **bot\_id** (*str*) – The bot's ID.

**get\_bot\_votes**(*bot\_id: str*) → *dbots.http.HTTPResponse*  
This function is a *coroutine* returning a *HTTPResponse*.

Gets the votes for this bot.

**Parameters** **bot\_id** (*str*) – The bot's ID.

**class dbots.DiscordListSpace**(*token=None*, *\*\*options*)

Represents the discordlist.space service.

**See also:**

- [discordlist.space Website](#)

- discordlist.space API Documentation

**get\_audit\_log**(*bot\_id*: str, \*\*query) → dbots.http.HTTPResponse

This function is a *coroutine* returning a HTTPResponse.

Gets the bot listing audit log.

#### Parameters

- **bot\_id** (str) – The bot's ID.
- **\*\*query** – The query string to append to the URL.

**get\_bot**(*bot\_id*: str) → dbots.http.HTTPResponse

This function is a *coroutine* returning a HTTPResponse.

Gets the bot listed on this service.

#### Parameters **bot\_id** (str) – The bot's ID.

**get\_bot\_analytics**(*bot\_id*: str, \*\*query) → dbots.http.HTTPResponse

This function is a *coroutine* returning a HTTPResponse.

Gets the analytics on a bot.

#### Parameters

- **bot\_id** (str) – The bot's ID.
- **\*\*query** – The query string to append to the URL.

**get\_bot\_owners**(*bot\_id*: str, \*\*query) → dbots.http.HTTPResponse

This function is a *coroutine* returning a HTTPResponse.

Gets the owners of the bot listing.

#### Parameters

- **bot\_id** (str) – The bot's ID.
- **\*\*query** – The query string to append to the URL.

**get\_bot\_reviews**(*bot\_id*: str, \*\*query) → dbots.http.HTTPResponse

This function is a *coroutine* returning a HTTPResponse.

Gets the reviews of a bot.

#### Parameters

- **bot\_id** (str) – The bot's ID.
- **\*\*query** – The query string to append to the URL.

**get\_bot\_votes**(*bot\_id*: str) → dbots.http.HTTPResponse

This function is a *coroutine* returning a HTTPResponse.

Gets the list of people who voted this bot on this service.

#### Parameters **bot\_id** (str) – The bot's ID.

**get\_bots**(\*\*query) → dbots.http.HTTPResponse

This function is a *coroutine* returning a HTTPResponse.

Gets a list of bots on this service.

#### Parameters **\*\*query** – The query string to append to the URL.

**get\_languages(\*\*query) → dbots.http.HTTPResponse**

This function is a *coroutine* returning a HTTPResponse.

Gets all the available languages that bots or servers can set as their language.

**Parameters** **\*\*query** – The query string to append to the URL.

**get\_statistics() → dbots.http.HTTPResponse**

This function is a *coroutine* returning a HTTPResponse.

Gets the statistics of this service.

**get\_tags(\*\*query) → dbots.http.HTTPResponse**

This function is a *coroutine* returning a HTTPResponse.

Gets all available tags for use on bots or servers.

**Parameters** **\*\*query** – The query string to append to the URL.

**get\_upvote\_leaderboard(bot\_id: str, \*\*query) → dbots.http.HTTPResponse**

This function is a *coroutine* returning a HTTPResponse.

Gets the top upvoters of this month.

**Parameters**

- **bot\_id (str)** – The bot's ID.
- **\*\*query** – The query string to append to the URL.

**get\_user(user\_id: str) → dbots.http.HTTPResponse**

This function is a *coroutine* returning a HTTPResponse.

Gets the user listed on this service.

**Parameters** **user\_id (str)** – The user's ID.

**get\_user\_bots(user\_id: str) → dbots.http.HTTPResponse**

This function is a *coroutine* returning a HTTPResponse.

Gets the user's bots listed for this service.

**Parameters** **user\_id (str)** – The user's ID.

**get\_user\_upvote(bot\_id: str, user\_id: str) → dbots.http.HTTPResponse**

This function is a *coroutine* returning a HTTPResponse.

Checks if a specific user has upvoted the bot.

**Parameters**

- **bot\_id (str)** – The bot's ID.
- **user\_id (str)** – The user's ID.

**get\_widget\_url(bot\_id: str, style: int = 1, \*\*query) → str**

Gets the widget URL for this bot.

**Parameters**

- **bot\_id (str)** – The bot's ID.
- **style (Optional[int])** – The style of the widget.
- **\*\*query** – The query string to append to the URL.

```
class dbots.DiscordListology(token=None, **options)
```

Represents the DiscordListology service.

**See also:**

- [DiscordListology Website](#)
- [DiscordListology API Documentation](#)

```
get_bot_stats(bot_id: str) → dbots.http.HTTPResponse
```

This function is a [coroutine](#) returning a HTTPResponse.

Gets the bot's stats listed on this service. :param bot\_id: The bot's ID. :type bot\_id: str

```
get_guild_stats(guild_id: str) → dbots.http.HTTPResponse
```

This function is a [coroutine](#) returning a HTTPResponse.

Gets the guild's stats listed on this service. :param guild\_id: The guild's ID. :type guild\_id: str

```
user_voted_bot(bot_id: str, user_id: str) → dbots.http.HTTPResponse
```

This function is a [coroutine](#) returning a HTTPResponse.

Checks whether or not a user has voted for a bot on this service. :param bot\_id: The bot's ID. :type bot\_id: str :param user\_id: The user's ID. :type user\_id: str

```
user_voted_guild(guild_id: str, user_id: str) → dbots.http.HTTPResponse
```

This function is a [coroutine](#) returning a HTTPResponse.

Checks whether or not a user has voted for a guild on this service. :param guild\_id: The guild's ID. :type guild\_id: str :param user\_id: The user's ID. :type user\_id: str

```
class dbots.DiscordServices(token=None, **options)
```

Represents the DiscordServices service.

**See also:**

- [DiscordServices Website](#)
- [DiscordServices API Documentation](#)

```
post_commands(bot_id: str, commands: list) → dbots.http.HTTPResponse
```

This function is a [coroutine](#) returning a HTTPResponse.

Posts commands info to your bot page.

**Parameters**

- **bot\_id (str)** – The bot's ID.
- **commands (list)** – The command info to post.

```
post_news(bot_id: str, title: str, content: str) → dbots.http.HTTPResponse
```

This function is a [coroutine](#) returning a HTTPResponse.

Posts news to your bot page.

**Parameters**

- **bot\_id (str)** – The bot's ID.
- **title (str)** – The title of the post.
- **content (str)** – The content of the post.

```
class dbots.DiscordsCom(token=None, **options)
```

Represents the Discords.com service (formerly Bots For Discord).

**See also:**

- [Discords.com Website](#)
- [Discords.com API Documentation](#)

```
get_bot(bot_id: str) → dbots.http.HTTPResponse
```

This function is a [coroutine](#) returning a HTTPResponse.

Gets the bot listed on this service.

**Parameters** `bot_id` (`str`) – The bot's ID.

```
get_bot_votes(bot_id: str) → dbots.http.HTTPResponse
```

This function is a [coroutine](#) returning a HTTPResponse.

Gets the list of people who voted a bot.

**Parameters** `bot_id` (`str`) – The bot's ID.

```
get_bot_votes_12h(bot_id: str) → dbots.http.HTTPResponse
```

This function is a [coroutine](#) returning a HTTPResponse.

Gets the list of people who voted a bot in the last 12 hours.

**Parameters** `bot_id` (`str`) – The bot's ID.

```
get_user(user_id: str) → dbots.http.HTTPResponse
```

This function is a [coroutine](#) returning a HTTPResponse.

Gets the user listed on this service.

**Parameters** `user_id` (`str`) – The user's ID.

```
get_user_bots(user_id: str) → dbots.http.HTTPResponse
```

This function is a [coroutine](#) returning a HTTPResponse.

Gets the user's bots listed for this service.

**Parameters** `user_id` (`str`) – The user's ID.

```
get_widget_url(bot_id: str, **query) → str
```

Gets the widget URL for this bot.

**Parameters**

- `bot_id` (`str`) – The bot's ID.
- `**query` – The query string to append to the URL.

```
class dbots.Disforge(token=None, **options)
```

Represents the Disforge service.

**See also:**

- [Disforge Website](#)
- [Disforge API Documentation](#)

```
get_homepage() → dbots.http.HTTPResponse
```

This function is a [coroutine](#) returning a HTTPResponse.

Retrieves the data shown on the homepage.

**get\_stats()** → *dbots.http.HTTPResponse*

This function is a *coroutine* returning a *HTTPResponse*.

Retreives statistics about Disforge.

**class dbots.FatesList(token=None, \*\*options)**

Represents the FatesList service.

**See also:**

- [FatesList Website](#)
- [FatesList API Documentation](#)

**add\_bot\_command(bot\_id: str, command: dict, \*\*query)** → *dbots.http.HTTPResponse*

This function is a *coroutine* returning a *HTTPResponse*.

Adds a bot promotion.

#### Parameters

- **bot\_id (str)** – The bot's ID.
- **command (dict)** – The command payload.
- **\*\*query** – The query string to append to the URL.

**add\_promotion(bot\_id: str, promotion: dict)** → *dbots.http.HTTPResponse*

This function is a *coroutine* returning a *HTTPResponse*.

Adds a bot promotion.

#### Parameters

- **bot\_id (str)** – The bot's ID.
- **promotion (dict)** – The promotion payload.

**delete\_bot\_command(bot\_id: str, command\_id: str)** → *dbots.http.HTTPResponse*

This function is a *coroutine* returning a *HTTPResponse*.

Deletes a bot's command.

#### Parameters

- **bot\_id (str)** – The bot's ID.
- **command\_id (str)** – The command ID.

**delete\_promotion(bot\_id: str, promotion\_id: str)** → *dbots.http.HTTPResponse*

This function is a *coroutine* returning a *HTTPResponse*.

Deletes a bot promotion.

#### Parameters

- **bot\_id (str)** – The bot's ID.
- **promotion\_id (str)** – The promotion ID.

**edit\_bot\_command(bot\_id: str, command: dict)** → *dbots.http.HTTPResponse*

This function is a *coroutine* returning a *HTTPResponse*.

Edits a bot's command.

#### Parameters

- **bot\_id (str)** – The bot's ID.

- **command** (`dict`) – The command payload.

**edit\_promotion**(`bot_id: str, promotion: dict`) → `dbots.http.HTTPResponse`

This function is a `coroutine` returning a `HTTPResponse`.

Edits a bot promotion.

#### Parameters

- **bot\_id** (`str`) – The bot's ID.
- **promotion** (`dict`) – The promotion payload.

**get\_bot**(`bot_id: str, **query`) → `dbots.http.HTTPResponse`

This function is a `coroutine` returning a `HTTPResponse`.

Gets a bot from the API.

#### Parameters

- **bot\_id** (`str`) – The bot's ID.
- **\*\*query** – The query string to append to the URL.

**get\_bot\_commands**(`bot_id: str`) → `dbots.http.HTTPResponse`

This function is a `coroutine` returning a `HTTPResponse`.

Get a bot's commands.

#### Parameters **bot\_id** (`str`) – The bot's ID.

**get\_bot\_promotion**(`bot_id: str`) → `dbots.http.HTTPResponse`

This function is a `coroutine` returning a `HTTPResponse`.

Gets a bot promotion.

#### Parameters **bot\_id** (`str`) – The bot's ID.

**get\_random\_bot**() → `dbots.http.HTTPResponse`

This function is a `coroutine` returning a `HTTPResponse`.

Gets a random bot.

**get\_votes**(`bot_id: str, user_id: str`) → `dbots.http.HTTPResponse`

This function is a `coroutine` returning a `HTTPResponse`.

Gets the number of votes a user gave to a bot.

#### Parameters

- **bot\_id** (`str`) – The bot's ID.
- **user\_id** (`str`) – The user's ID.

**get\_votes\_timestamped**(`bot_id: str, user_id: str`) → `dbots.http.HTTPResponse`

This function is a `coroutine` returning a `HTTPResponse`.

Gets the number of votes a user gave to a bot with timestamps.

#### Parameters

- **bot\_id** (`str`) – The bot's ID.
- **user\_id** (`str`) – The user's ID.

**regenerate\_token**(`bot_id: str`) → `dbots.http.HTTPResponse`

This function is a `coroutine` returning a `HTTPResponse`.

Regenerates the API token.

**Parameters** `bot_id` (`str`) – The bot’s ID.

```
class dbots.InfinityBotList(token=None, **options)
    Represents the Infinity Bot List service.
```

**See also:**

- [Infinity Bot List Website](#)
- [Infinity Bot List API Documentation](#)

**get\_bot** (`bot_id: str`) → `dbots.http.HTTPResponse`  
This function is a *coroutine* returning a `HTTPResponse`.

Gets the bot listed on this service.

**Parameters** `bot_id` (`str`) – The bot’s ID.

**get\_user** (`user_id: str`) → `dbots.http.HTTPResponse`  
This function is a *coroutine* returning a `HTTPResponse`.

Gets the user listed on this service.

**Parameters** `user_id` (`str`) – The user’s ID.

```
class dbots.Listcord(token=None, **options)
    Represents the Listcord service.
```

**See also:**

- [Listcord Website](#)
- [Listcord API Documentation](#)

**get\_bot** (`bot_id: str`) → `dbots.http.HTTPResponse`  
This function is a *coroutine* returning a `HTTPResponse`.

Gets the bot listed on this service.

**Parameters** `bot_id` (`str`) – The bot’s ID.

**get\_bot\_pack** (`pack_id: str`) → `dbots.http.HTTPResponse`  
This function is a *coroutine* returning a `HTTPResponse`.

Gets a bot pack.

**Parameters** `pack_id` (`str`) – The pack’s ID.

**get\_bot\_packs** () → `dbots.http.HTTPResponse`  
This function is a *coroutine* returning a `HTTPResponse`.

Gets all botpacks.

**get\_bot\_reviews** (`bot_id: str`) → `dbots.http.HTTPResponse`  
This function is a *coroutine* returning a `HTTPResponse`.

Gets a bot’s reviews.

**Parameters** `bot_id` (`str`) – The bot’s ID.

**user\_voted** (`bot_id: str, user_id: str`) → `dbots.http.HTTPResponse`  
This function is a *coroutine* returning a `HTTPResponse`.

Gets whether a user has voted for a bot.

**Parameters**

- **bot\_id** (`str`) – The bot's ID.
- **user\_id** (`str`) – The user's ID.

**class dbots.MotionBotlist(`token=None, **options`)**  
Represents the MotionBotlist service.

See also:

- MotionBotlist Website
- MotionBotlist API Documentation

**get\_bot(`bot_id: str`) → `dbots.http.HTTPResponse`**  
This function is a *coroutine* returning a `HTTPResponse`.

Gets a bot.

Parameters **bot\_id** (`str`) – The bot's ID.

**get\_bot\_votes(`bot_id: str`) → `dbots.http.HTTPResponse`**  
This function is a *coroutine* returning a `HTTPResponse`.

Gets a bot's reviews.

Parameters **bot\_id** (`str`) – The bot's ID.

**class dbots.SpaceBotsList(`token=None, **options`)**  
Represents the Space Bots List service.

See also:

- Space Bots List Website
- Space Bots List API Documentation

**get\_bot(`bot_id: str`) → `dbots.http.HTTPResponse`**  
This function is a *coroutine* returning a `HTTPResponse`.

Gets the bot listed on this service.

Parameters **bot\_id** (`str`) – The bot's ID.

**class dbots.TopCord(`token=None, **options`)**  
Represents the TopCord service.

See also:

- TopCord Website
- TopCord API Documentation

**get\_bot(`bot_id: str`) → `dbots.http.HTTPResponse`**  
This function is a *coroutine* returning a `HTTPResponse`.

Gets the bot listed on this service.

Parameters **bot\_id** (`str`) – The bot's ID.

**get\_bots() → `dbots.http.HTTPResponse`**  
This function is a *coroutine* returning a `HTTPResponse`.

Lists every bot on this service.

**class dbots.TopGG(*token=None*, \*\**options*)**

Represents the Top.gg service.

**See also:**

- [Top.gg Website](#)
- [Top.gg API Documentation](#)

**get\_bot(*bot\_id: str*) → dbots.http.HTTPResponse**

This function is a [coroutine](#) returning a HTTPResponse.

Gets the bot listed on this service.

**Parameters** **bot\_id** (*str*) – The bot's ID.

**get\_bot\_stats(*bot\_id: str*) → dbots.http.HTTPResponse**

This function is a [coroutine](#) returning a HTTPResponse.

Gets the bot's stats listed on this service.

**Parameters** **bot\_id** (*str*) – The bot's ID.

**get\_bot\_votes(*bot\_id: str*) → dbots.http.HTTPResponse**

This function is a [coroutine](#) returning a HTTPResponse.

Gets the list of people who voted this bot on this service.

**Parameters** **bot\_id** (*str*) – The bot's ID.

**get\_bots(\*\**query*) → dbots.http.HTTPResponse**

This function is a [coroutine](#) returning a HTTPResponse.

Gets a list of bots on this service.

**Parameters** **\*\*query** – The query string to append to the URL.

**get\_user(*user\_id: str*) → dbots.http.HTTPResponse**

This function is a [coroutine](#) returning a HTTPResponse.

Gets the user listed on this service.

**Parameters** **user\_id** (*str*) – The user's ID.

**get\_widget\_url(*bot\_id: str*, *small\_widget: Optional[str] = None*, \*\**query*) → str**

Gets the widget URL for this bot.

**Parameters**

- **bot\_id** (*str*) – The bot's ID.
- **small\_widget** (*Optional[str]*) – The sub-path name to turn the widget into a badge. (i.e. owner)
- **\*\*query** – The query string to append to the URL.

**user\_voted(*bot\_id: str*, *user\_id: str*) → dbots.http.HTTPResponse**

This function is a [coroutine](#) returning a HTTPResponse.

Gets the list of people who voted this bot on this service.

**Parameters**

- **bot\_id** (*str*) – The bot's ID.
- **user\_id** (*str*) – The user's ID.

**class dbots.VoidBots(*token=None, \*\*options*)**

Represents the Void Bots service.

**See also:**

- Void Bots Website
- Void Bots API Documentation

**get\_bot(*bot\_id: str*) → dbots.http.HTTPResponse**This function is a *coroutine* returning a HTTPResponse.

Gets the bot listed on this service.

**Parameters** **bot\_id** (*str*) – The bot's ID.**get\_bot\_analytics(*bot\_id: str*) → dbots.http.HTTPResponse**This function is a *coroutine* returning a HTTPResponse.

Gets the bot's analytics on this service.

**Parameters** **bot\_id** (*str*) – The bot's ID.**get\_bot\_reviews(*bot\_id: str*) → dbots.http.HTTPResponse**This function is a *coroutine* returning a HTTPResponse.

Gets the bot's reviews on this service.

**Parameters** **bot\_id** (*str*) – The bot's ID.**user\_voted(*bot\_id: str, user\_id: str*) → dbots.http.HTTPResponse**This function is a *coroutine* returning a HTTPResponse.

Checks whether or not a user has voted for a bot on this service.

**Parameters**

- **bot\_id** (*str*) – The bot's ID.
- **user\_id** (*str*) – The user's ID.

**class dbots.WonderBotList(*token=None, \*\*options*)**

Represents the Wonder Bot List service.

**See also:**

- Wonder Bot List Website
- Wonder Bot List API Documentation

**get\_bot(*bot\_id: str*) → dbots.http.HTTPResponse**This function is a *coroutine* returning a HTTPResponse.

Gets the bot listed on this service.

**Parameters** **bot\_id** (*str*) – The bot's ID.**get\_user(*user\_id: str*) → dbots.http.HTTPResponse**This function is a *coroutine* returning a HTTPResponse.

Gets the user listed on this service.

**Parameters** **user\_id** (*str*) – The user's ID.

```
class dbots.YABL(token=None, **options)
```

Represents the YABL service.

See also:

- YABL Website
- YABL API Documentation

```
get_bot(bot_id: str) → dbots.http.HTTPResponse
```

This function is a *coroutine* returning a HTTPResponse.

Gets the bot listed on this service.

Parameters **bot\_id** (str) – The bot's ID.

```
get_bots() → dbots.http.HTTPResponse
```

This function is a *coroutine* returning a HTTPResponse.

Gets a list of bots on this service.

```
get_bots_by_page(**query) → dbots.http.HTTPResponse
```

This function is a *coroutine* returning a HTTPResponse.

Gets a page of bots on this service.

Parameters **\*\*query** – The query string to append to the URL.

```
get_random_bots() → dbots.http.HTTPResponse
```

This function is a *coroutine* returning a HTTPResponse.

Gets 20 random bots from this service.

```
get_unverified_bots() → dbots.http.HTTPResponse
```

This function is a *coroutine* returning a HTTPResponse.

Gets a list of unverified bots on this service.

```
get_user_bots(user_id: str) → dbots.http.HTTPResponse
```

This function is a *coroutine* returning a HTTPResponse.

Gets the user's bots listed for this service.

Parameters **user\_id** (str) – The user's ID.

```
invalidate(bot_id: str) → dbots.http.HTTPResponse
```

This function is a *coroutine* returning a HTTPResponse.

Invalidates the token being used in the request.
